US90-30EN jumbo

US90-30EN jumbo

The US90-30EN Jumbo pushbutton is a classic square extra large button. The button was designed not only to meet the requirements of EN81-70 Annex G.1. but also for use in larger buildings such as hospitals, airports and shopping centres, where the sheer scale of the building necessitates a larger button. The black background to the pressel provides a clear contrast to the tactile legend and also to the faceplate as required by EN81-70. On call acceptance the large 30mm high legend illuminates brightly and you have the choice of many colour options. The US90-30EN Jumbo has an identical appearance to the standard US90-EN and so the two buttons can be used on faceplates together when appropriate.

key features

- 30mm high tactile legend
- Legend and halo illumination
- High contrast between legend and pressel
- Vandal resistant
- Extra large button
- Large range of pressels
- Standard pressels are a black plate moulded with opal polycarbonate
